

C-Level Executive Analysis FY2026–27

CONFIDENTIAL · BOARD READY

Talent Formula (TF) · Frontline Accounting / FLA (FA) · AI Digital · Consolidated Group

✓ ENHANCED V2.0

Budget Forecast FY25/26 Base → FY28/29 Long-Range | Prepared August 2026 | Revised & Enhanced — Board Submission Draft

Prepared by [Kranthi Bommu](#) for Board Submission

01 EXECUTIVE SUMMARY

This is not a routine budget submission. It is a declaration of intent. The combined Talent Formula group — comprising [Talent Formula \(TF\)](#), [Frontline Accounting / FLA \(FA\)](#), and [AI Digital](#) — is building something genuinely differentiated in the professional services market: a business that integrates [domain-specialist offshore accounting](#), a [proven recruitment and delivery engine](#), and a [proprietary AI platform](#) — all under one roof.

The numbers reflect this ambition. Group revenue scales from [\\$33.3M \(FY25/26\)](#) to [\\$72.5M by FY28/29](#) — a 2.2× expansion driven by real operating leverage, not financial engineering. EBITDA margin inflects from [9.3% today](#) to [~24% by FY28/29](#) as FA's digital layer matures, TF's UK and US markets scale, and AI Digital converts existing clients into recurring SaaS revenue.

The Board is not just investing in a forecast. It is investing in [a team that has already built the delivery capability, the client base, and the AI infrastructure](#) to execute against it. This document explains why — and what the Board needs to believe for the plan to succeed.

03 WHY THIS BUDGET IS DIFFERENT — & WHY NOW
Why This Budget Is Different

Most budget submissions are extrapolations of the past. This one is not. For the first time in the group's history, **all three growth engines are operating simultaneously** — FA's managed service headcount is scaling with a digital margin layer on top, TF's recruitment engine is opening new geographic markets, and AI Digital is converting the existing client base into recurring platform revenue.

The combination of **accounting domain expertise, offshore delivery infrastructure**, and a **proprietary AI platform** purpose-built for the accounting sector does not exist elsewhere in the market at this price point or at this scale. Competitors are either pure-play offshore staffing (no AI, no specialisation) or pure-play SaaS (no delivery capability, no domain depth). **We are building both, together.**

Why Now — The Market Window Is Open

Three structural forces are converging simultaneously:

- 1. Accountant shortage:** The US workforce dropped ~10% from 2019–2024. Australia and the UK face the same structural gap — creating unprecedented demand for offshore talent.
- 2. AI adoption inflection:** The AI in accounting market is valued at \$6.68B in 2025 and is expected to reach \$37.6B by 2030 — a CAGR of 41%. Firms are actively seeking AI-enabled partners.
- 3. Outsourcing acceleration:** The global finance and accounting outsourcing market reached \$54.79B in 2025 and is projected to hit \$81.25B by 2030. In 2026, 30–35% of small and mid-size US CPA firms use offshore outsourcing, and it is accelerating.

04 WHY TALENT FORMULA IS UNIQUELY POSITIONED TO WIN

**Accounting
Specialisation**

We don't serve every industry — we go deep in accounting.

**Proven Delivery
Capability**

FA has already placed 600+ FTEs across ANZ accounting

AI-First Operating Model

AI Digital is not a bolt-on product — it is baked into how we service clients. Our

Recruitment Engine

TF's recruitment capability spans AUD, UK, and emerging US markets. The ability to

**Client Relationships &
Implementation
Expertise**

FA/FLA's 761 specialist offshore accountants, trained on local compliance frameworks, deliver quality that generalist offshore providers cannot match. Specialisation commands premium pricing and retention.

firms at scale. The delivery infrastructure — hiring pipelines, onboarding systems, quality frameworks — is built and operational. This is not a start-up risk. The engine exists and is running.

proprietary AI platform (54.6% GM) is deployed across the FA and TF client base, creating a compounding flywheel: more clients → more data → better AI → higher retention.

source, assess, and place accounting talent at speed — and at scale — is a genuine moat. FLA is targeting 968 FTEs by FY27/28, a scale most offshore providers cannot reach in this sector.

FA's 180+ managed service clients, TF's 50+ active clients, and Backroom's client base (acquired February) represent a captive distribution channel for AI Digital totalling 410 clients across the combined group. The cost of acquisition for SaaS is near zero — we're upselling trusted relationships, not cold prospecting.

People + AI Integration

The unique ability to combine offshore accounting talent with an AI platform purpose-built for the sector creates a value proposition no pure-play competitor can replicate: clients get expert humans AND intelligent automation — on a single, integrated contract.

05 OUR FY2027 STRATEGIC PRIORITIES

1

Successfully Integrate Frontline Accounting

Execute the TF + FA integration playbook, realise \$1.65M synergies, and establish one unified leadership team operating from a single operating model.

2

Scale AI Digital

Convert 30%+ of the combined 410-client base to the AI Digital platform — noting that FA revenue starts from September and Backroom revenue commences post-February acquisition. AI Digital revenue is therefore phased through the year rather than calculated across all 410 clients from day one. Hit \$2.1M in Year 1, building toward \$3.4M by

3

Accelerate UK Growth

Grow TF UK from \$2.7M → \$4.9M by activating the named pipeline, appointing a UK Growth Lead, and achieving 1.3x pipeline coverage before FY26/27 lock.

4

Expand into the US

Launch US operations leveraging the US accounting workforce shortage — down ~10% from 2019 to 2024 — with TF's offshore model as the solution. Target first \$1M US revenue by FY27/28.

FY28/29 and 65%+ gross margins.

5 **Improve EBITDA**

Drive group EBITDA from 9.3% → 12.3% in FY26/27 via synergy realisation, FA margin improvement (14% → 27.5% by FY27/28), and AI Digital contribution growth.

6 **Build Leadership Capability**

Invest in the leadership bench across TF and FA, establish clear P&L ownership by entity, and build the management infrastructure to support a \$72M business by FY28/29.

06 MARKET SIZING — THE OPPORTUNITY WE'RE ACQUIRING INTO

Our acquisition strategy (FA + Backroom) positions the group at the intersection of two explosive markets: offshore accounting services and AI-enabled accounting platforms. Here is the scale of what we're stepping into.

AU AUSTRALIA — ACCOUNTING SERVICES

\$33.7B

Total market (IBISWorld, 2024)
F&A BPO sub-market: \$797M in 2024, growing to \$1.32B by 2030

8.8% CAGR to 2030

GB UK — ACCOUNTING SERVICES

\$51B

UK accounting market projected at \$51.12B in 2026
TF's current UK revenue: \$4.9M — 0.01% penetration. Enormous runway.

Growing 5%+ CAGR

US US — OFFSHORE ACCOUNTING

\$55B+

Global F&A outsourcing market reached \$54.79B in 2025, US leads at 40.88% share
US buyers pivot to India where deep technical skills and professional certifications are plentiful.

9.1% CAGR to 2030

GLOBAL AI IN ACCOUNTING

\$6.7B → \$37.6B

AI in accounting valued at \$6.68B in 2025, expected to reach \$37.6B by 2030 — a CAGR of 41%.

41% CAGR 2025–2030

OFFSHORE ACCOUNTING FOR ENTERPRISE

56% Offshore

Offshore deployment contributed 56.53% of F&A outsourcing revenue share in 2025.
Businesses reduce labour expenses by 50–70% when hiring offshore accountants vs local hires.

Fastest-growing segment

WHAT WE'RE INHERITING (FA + BACKROOM ACQUISITIONS)

410 Clients

FA's 180+ ANZ accounting firm clients + TF's 50+ active clients + Backroom's client base (acquired

February). Ready-made distribution channel for AI Digital. FA's 620-person delivery base becomes the launch pad for AU, UK and US expansion. Note: FA revenue commences September; Backroom revenue commences post-February acquisition.

Built-in moat

EBITDA Margin Progression (%)

08 UK GROWTH — PIPELINE VALIDATION & RISK MANAGEMENT

UK revenue is modelled to grow from **\$2.72M → \$4.87M (+79%) in FY26/27**. Rather than simply flagging this as a risk, we present below our pipeline management framework and how we're validating the assumption.

TF UK Revenue Pipeline — FY26/27 Target: \$4.87M

Opportunity	Est. ARR	Stage	Close	Confidence
Existing Client Expansion — Accounts	\$1,100k	Active	Jul 26	90%

UK Risk Management Framework

Existing client renewals + expansion	\$1,720k · Committed
Active proposals (75%+ confidence)	\$1,430k · High confidence

OPPORTUNITY	EST. ARR	STAGE	CLOSE	CONFIDENCE
Mid-Tier UK Firm — Tax & Advisory	\$780k	Proposal	Aug 26	75%
Enterprise BPO Contract — London	\$650k	Negotiation	Sep 26	60%
Regional Accounting Group — North	\$520k	Proposal	Oct 26	55%
Referral Pipeline — Existing Clients	\$480k	Qualifying	Nov 26	50%
Organic Growth — Existing Accounts	\$620k	Committed	Ongoing	85%
New Logo — FS Sector	\$400k	Qualifying	Dec 26	35%
Total Weighted Pipeline	\$4,550k	Pipeline coverage: ~1.25x		~65%

Pipeline coverage is currently 1.25x target. **Action required:** Appoint UK Growth Lead by Q1 FY26/27 and achieve 1.5x coverage before Board approval of UK budget. Named opportunities to be presented at monthly board pack.

Mid-pipeline (50–60% confidence) \$1,000k · Developing

Early-stage / new logos \$400k · Speculative

Downside protection: Even at a 20% pipeline miss, UK revenue lands at ~\$3.9M — still +43% YoY vs FY25/26. EBITDA impact: ~(\$250k) vs plan. Within tolerance if ANZ/Other segments perform to plan.

09 AI DIGITAL — THREE-SCENARIO ADOPTION MODEL

AI Digital pricing: \$15,000 one-off initiation fee + \$2,700/month platform fee + \$1,800/month per custom AI employee.

The combined client base is **410 clients** in total — comprising FA's 180+ clients, TF's 50+ clients, and Backroom's client base (acquired February). However, because **FA revenue does not commence until September** and the **Backroom acquisition does not complete until February**, AI Digital revenue cannot be calculated across the full 410-client base from day one. The base scenario therefore assumes **30% adoption of the addressable client base available within the year**, phased from each entity's respective go-live date. We present three outcomes below.

Important note on client base timing and composition: The 410 combined clients are made up of FA's 180+ clients, TF's 50+ clients, and Backroom's client base. They are not all available on Day 1. TF's ~50 clients are accessible from the outset. FA clients become accessible from September. Backroom clients become accessible post-February acquisition. Revenue projections

reflect this phasing — earlier periods draw on TF's existing client base only, scaling as each acquisition entity becomes available.

METRIC	🐻 BEAR CASE	📊 EXPECTED CASE	🚀 STRETCH CASE
Client Adoption Rate	15%	30%	45%
Clients Converted (of 410, phased)	~62 clients	~123 clients	~185 clients
FY26/27 Revenue (phased)	~\$1.07M	\$2.13M	~\$3.20M
FY26/27 Gross Profit	~\$320k	\$1,165k	~\$1,900k
FY26/27 EBITDA	~\$(250k)	\$590k	~\$1,450k
GP Margin	~30%	54.6%	~59%
FY28/29 ARR (run rate, full 410-client base)	~\$1.8M	\$3.4M	~\$5.2M
Board Recommendation	Approve with review gate at month 6. If tracking below bear, pause new AI Digital opex.	Budget this case. Monthly pipeline reporting to Board.	Pursue via accelerated sales hire. Upside to capture if TF clients convert faster.

The \$1.65M p.a. synergy figure is real and defensible. Below is the full synergy register — itemised by category, owner, timing, value and confidence level. This register replaces the single-line budget entry and will be reported monthly to the Board.

Shared Services Consolidation — Finance & Admin

Merge duplicate finance, payroll, and admin functions across TF and FA. Reduce to single shared services team operating across both entities from one platform.

\$480k
ANNUAL VALUE

Q1 FY27
TIMING

CFO
OWNER

High

Technology Platform Rationalisation

Consolidate duplicate ATS, HRIS, CRM, and billing systems. Migrate both entities to single tech stack. Eliminate vendor duplication across 6+ platforms.

\$320k

*AI Digital ARR ÷ active AI clients***GP PER TF FTE****\$22.1k**

TF gross profit per FTE per annum

*TF GP ÷ avg TF headcount***12 STRENGTHS****Diversified, Resilient Revenue Base**

Three distinct business units — TF staffing/outsourcing, FA managed services, AI Digital platform — provide structural resilience. No single entity exceeds 62% of group revenue, and each BU has a different growth driver, limiting correlated downside risk.

**Structural Operating Leverage in FA**

FA's EBITDA margin jumps from 14% → 27.5% in FY27/28 as digital revenue layers onto the existing headcount base at near-zero marginal cost. This is the architecture of a scalable services business — fixed delivery infrastructure with high-margin revenue on top.

**AI Digital — Highest-Margin Product in the Group**

At 54.6% gross margin and 27.6% EBITDA in Year 1, AI Digital is the group's most capital-efficient product. Infrastructure is largely fixed at \$969k/yr — every new client adds near-full-margin incremental revenue. By FY28/29, GP margin reaches 65.6%.

**Geographic Diversification & Expansion Optionality**

TF's revenue split (AUD 55.5%, UK 36.6%, Other 7.9%) provides natural FX and market diversification. The UK presence is an established platform for US expansion. No competitor in this space has proven this multi-geography model in accounting outsourcing at scale.

**Built-In Distribution for AI Digital**

The combined 410-client base — FA's 180+ clients (accessible from September), TF's 50+ clients (accessible from day one), and Backroom's client base (accessible post-February acquisition) — is the AI Digital sales channel. Customer Acquisition Cost is near zero. This dramatically de-risks the AI adoption assumption vs. a greenfield SaaS company.

**Proven Delivery Engine — Not a Start-Up Risk**

FA has already placed and managed 600+ offshore accounting FTEs. The infrastructure, quality frameworks, compliance processes, and management bandwidth exist today. The FY26/27 headcount ramp (620 → 761) is an execution of a proven model — not an experiment.

13 KEY RISKS & MITIGATIONS**FA Headcount Scale-Up Risk HIGH**

FLA headcount target: 620 → 761 (+23%) in FY26/27, → 968 (+27%) in FY27/28. At avg cost of \$9,317/FTE/yr, each 10% headcount shortfall = ~\$1.5M revenue miss.

Mitigation: Monthly headcount vs. plan dashboard. TF recruitment engine deployed for FLA hiring. Alert at 5% and 10% miss. Vacancy pipeline reviewed weekly by COO.

**TF UK Revenue Growth Assumption HIGH**

UK revenue modelled +79% YoY. Named pipeline presented in Section 08 supports ~1.25× coverage. **Mitigation:** UK Growth Lead appointed by Q1. Pipeline coverage threshold: 1.5× before budget lock. 20% miss = ~\$250k EBITDA impact — within group tolerance if ANZ performs.

**AI Digital Adoption Uncertainty HIGH**

Three scenarios presented (Section 09). Bear case (15% adoption) = ~\$(250k) EBITDA in FY26/27. Revenue is phased — TF's ~50 clients accessible from day one; FA clients accessible from September; Backroom clients from post-February acquisition only.

Mitigation: 6-month review gate. If bear case tracking, pause AI opex. AI Digital budget funded from group cash — no external capital required. Monthly Board reporting on client conversion rate.

**TF Gross Margin Compression MEDIUM**

TF GP margin declining 53.5% → 45.1% over 4 years as headcount grows faster than billing rate. **Mitigation:** Annual pricing review cycle. Target billing rate uplift of 3–5% p.a. per existing client. UK clients command higher per-head rates — UK growth mix improves blended rate. Monitor GP/FTE monthly.

**FA Facilities Cost Step-Change MEDIUM**

Facilities cost doubles \$587k → \$1,046k in FY27/28 to support 968 FTEs. Fixed commitment once leased. **Mitigation:** Stage lease commitments in line with headcount milestones. Require 80%+ headcount achievement before signing next tranche. Flexible co-working as buffer during ramp.

**FX Exposure — GBP/AUD & INR/AUD MEDIUM**

TF carries ~37% GBP and ~55% INR revenue exposure. Model uses flat AUD rates.

Mitigation: Implement rolling 6-month GBP/AUD forward cover by Q1 FY26/27. Present hedged vs. unhedged position quarterly to Board. Model 5% FX sensitivity in each Board pack.

14 C-LEVEL RECOMMENDATIONS

**1. Approve Synergy Register (Immediate)**

Replace the single-line \$1.65M synergy entry with the itemised register in Section 10. Board to approve register and assign owners before budget finalisation. Monthly synergy tracking report to be included in Board pack from Q1 FY26/27.

**2. Appoint UK Growth Lead (Immediate)**

Hire or appoint a UK Growth Lead by August 2026. This person owns the UK pipeline, named opportunities, and is accountable for 1.5x pipeline coverage before Q2 FY26/27. Board to receive UK pipeline update monthly.

**3. Launch AI Digital 6-Month Review Gate (Q1 FY27)**

AI Digital to be tracked against bear/expected/stretch scenarios monthly. If tracking below bear case at month 6, present a revised plan before committing to FY27/28 AI Digital opex. Client conversion rate is the primary lead indicator.

**4. Deploy Operational KPI Dashboard (Q1 FY27)**

Implement monthly executive dashboard with the 12 operational KPIs in Section 11. CEO and Board to review at every monthly meeting. KPIs are leading indicators — they show where FY27 is going before financials confirm it.

**5. Develop US Market Entry Plan (Short-term)**

Commission a US market entry plan by Q2 FY26/27. Leverage TF's UK model and India delivery base. Target first US client by FY27/28. US CPA firm offshore adoption sits at 30–35% and is accelerating — the window is open now.

**6. Implement FX Hedging Policy (Short-term)**

CFO to implement rolling 6-month GBP/AUD forward cover. Disclose hedged vs. unhedged position quarterly. Model 5% FX sensitivity in every Board pack from FY26/27 Q1 onwards.

**7. Build FA Headcount KPI Dashboard (Immediate)**

Monthly FLA headcount vs. plan tracking with alerts at 5% and 10% miss. Include billing utilisation rate, revenue/FTE, and average days on-billing as lead indicators. COO-owned and reviewed at every Board meeting.

**8. Present Board Downside / Stress Scenario (Next Board)**

Present a -20% UK revenue, -15% FLA headcount miss, and 15% AI adoption scenario to the Board alongside base case. Show EBITDA range. Demonstrate the business remains cash-generative even in downside — this builds Board confidence in the base case plan.

**9. Stage FA Facility Commitments (FY26/27)**

Require 80%+ FLA headcount milestone achievement before signing next lease tranche for FY27/28 facility expansion (doubling from \$587k → \$1.046M). Protect the business from fixed-cost overrun if FLA hiring falls short.
